每年，有上千萬的鯊魚被捕殺，鯊魚的魚鰭被割掉後，便活活地被丟回海裡。這樣殘忍的捕捉方式，使得鯊魚以及與鯊魚共同生存在同一個海域的生物造成生存上的危機。魚翅可能含有高濃度的水銀，因此，食用魚翅也可能會對我們的健康造成傷害。

請您的餐廳打電話到

一份 **"不供應魚翅"**
的承諾。

謝謝您！

Please sign a "no shark fin" restaurant pledge by calling Humane Society International at 301-258-1401. Thank you.
Each year, tens of millions of sharks have their fins cut off, then are thrown back into the water, dead or dying. This cruel practice, called shark finning, threatens the survival of sharks and other species that rely on them. Consuming shark fin, which can contain high levels of mercury, may cause health problems.
